

BHUPESH GOYAL

ANALYST PROGRAMER L2

PHONE | (+91) 9467586035
EMAIL | goyalbhupesh624@gmail.com
LOCATION | Gurugram, INDIA
EXPERIENCE | 4 Years 6 Months

Key Skills

- RESTful APIs
- Angular
- Web API
- C Sharp
- C#
- SQL Server
- Entity Framework
- LINQ
- Javascript
- TypeScript
- Rxjs
- GIT
- Azure DevOps
- Stored Procedures
- Rest Web API
- Postman
- Agile
- Fullstack Development
- Insurance Domain
- Unit Testing
- ASP.NET Core
- .NET Core

Certification

- Python Course

Profile Summary

Results-oriented Full Stack Developer with 4+ years of expertise in building scalable web applications using .NET Core, Angular, and SQL Server. Currently an Analyst Programmer L2 at Xceedance, specializing in high-performance enterprise solutions for the insurance domain. Skilled in RESTful API development, database architecture, agile methodologies, and system security. Proven ability to design and implement robust business logic and collaborate with cross-functional teams. Successfully contributed to projects like Risk Management Platform and Underwriting System by delivering clean, testable code and optimizing workflows. Seeking a challenging role with a Gurgaon-based MNC to drive innovative product development and transformative solutions.

Work Experience

Analyst Programer L2

Xceedance

05/2025 - Present

- Developed and maintained web-based enterprise applications in the insurance domain using .NET Core and C#.
- Utilized Angular and TypeScript to enhance user interface and improve user experience.
- Collaborated with cross-functional teams to effectively gather requirements and design robust system architecture.
- Implemented business logic ensures high performance, scalability, and security within applications.
- Engaged in continuous integration and deployment practices to streamline development processes.
- Conducted code reviews and provided mentorship to junior developers to

- Web Design And Development
- Azure Fundamentals(AZ 900)

Projects

Risk Data Platform

322 Days

The Risk Data Platform (RDP) is an enterprise-level application designed to streamline risk assessment, monitoring, and reporting for insurance and financial domains. The platform enables organizations to evaluate potential risks, automate workflows, and ensure compliance through advanced analytics and real-time monitoring.

Underwriting

1338 Days

Underwriting is a cutting-edge digital solution developed with Angular, .NET Core, and SQL Server technologies. It represents a comprehensive solution designed to transform and optimize the processes within the insurance industry. From the initial submission of data to the generation of quotes and the issuance of policies, Underwriting smoothly manages the entire process, simplifying operations and boosting overall efficiency.
